

Advisory Regarding Admission to Medical Faculties in the Egyptian Universities

1. Many education consultancies and firms advising students on the admission process to medical faculties in Egyptian universities have come to the Embassy's attention, as some assurances being made are not fulfilled. These include security clearance arrangements, accommodation, assistance with visa documentation and renewals, placement in top universities, and other related services. Indian students wishing to pursue higher education in Egypt are advised to review the **FAQs** on the Mission's website or visit the **official websites of Egyptian universities** or the **Study in Egypt portal** (<https://admission.study-in-egypt.gov.eg>) to obtain accurate and reliable information.

2. Indian students studying in Egypt are advised to renew or extend their visas well before expiry. Overstaying without a valid visa is illegal and may lead to fines, detention, or arrest by Egyptian authorities.
